WHAT WE READ

WHAT WE LEARNED

We read A LOT of books in May! Kindergarten worked on rhyming skills, made connections and built things you find at the beach. First grade learned about a clever little octopus, created food characters, imagined what they would wish for if they had a magic word and built popsicles. Second grade learned about a group of boys who built their own soccer field, read about some very interesting shapes and read a one word story! Third graders studied the works of Adam Rex, while exploring topics such as theme and character traits. They also looked back over their reading throughout the year and helped each other build a summer reading list. Fourth grade read some very strange books in our first ever Weird Books unit and reminisced about the memories they would like to take with them from their time at Copper Hill. It was a busy month!

SPECIAL SHOUT-OUT

This year, Adrian Yanez was chosen out of all the fourth graders in the entire county to receive the Hunterdon County Library Association's Enthusiastic Reader Award. It has been such a pleasure watching him grow as a reader and it was great fun seeing him receive this award! Congratulations Adrian!
