

### **Making inferences**

- Write details from the text in the “Text Clues” column.
- Use prior knowledge & background information that you know already, from your personal experiences in the “What I know” column. This includes things that have happened to you, information from other books you have read, television shows you have watched, and/or news stories you have learned about.
- Now use that information to make a relevant inference. Make sure it is something that was not stated in the text.
